

Navigating Our Renovation *Together*

We begin our parish renovation journey of preparing a beautiful and welcoming space.

As construction gets underway, there are several important details we need all parishioners to know. Some aspects of parish life will change temporarily over the coming months, while many things will remain the same. ***Below are a few key points to help us navigate the months ahead.***

Parking changes

Construction equipment will take up most of the Chapel parking lot. Beginning June 25, we ask that only parishioners who *need* to utilize the marked available Chapel parking lot spaces for Eucharistic Adoration or to access the elevator do so. (See map provided.)

Construction Zone Safety

We have the blessing of many young families! Because this will be an active construction zone, it is imperative that parents closely supervise their children and keep children with them at all times while on campus, especially during this process.

Our Lady of Angels Chapel

Beginning June 29, the only entrance to the Chapel and to the elevator will be the single door right off the parking lot. The double-door downstairs entry point will be blocked off. The bathrooms outside the Chapel will no longer be accessible beginning June 25.

Construction Zone Courtesy

We know parishioners may wish to thank the construction crew or ask questions. To help the workers remain focused and avoid delays, all comments, questions and concerns should be directed to the director of parish operations (*see below*).

Meeting spaces

Some parish groups and ministries are continuing to meet during the summer at the St. Joseph Center. If you are part of a ministry or group and have questions about your meeting location, please contact your specific ministry leader.

Increased Noise Levels

Construction activity will occasionally result in increased noise, light vibrations, and dust. We appreciate your patience and understanding throughout the renovation process.

Questions, Concerns & Feedback

If you have any concerns, questions or positive feedback, please send it directly to our Director of Parish Operations, Bertha Medina, via email at bmedina@icwnc.com.

Important: We ask that you please do not try to communicate with the construction teams. Thank you!
